**Working With Prompts**

## Trending AI Wall Art: 500 Current Prompts and More

Welcome to Trending AI Wall Art. In this video, I'm going to go over the prompts that are included.

And what we've done here is we've really delved into the research for what is going to be hot and trending with art styles here in the next few years. And basically we've come up with 20 prompts each, so you have 500 wall art prompts to start with, but of course you can use those and remix and do more.

## Trending AI Wall Art: 500 Current Prompts and More

### Working With Wall Art Prompts

- 25 hot trending art styles
- 20 prompts each

So, when you're remixing or changing these, you have a couple of options. You can take the actual prompt and change it up a bit, or you can take the output and whatever tool you're using, you can ask it to make changes or tweak it, whatever you want to do here.

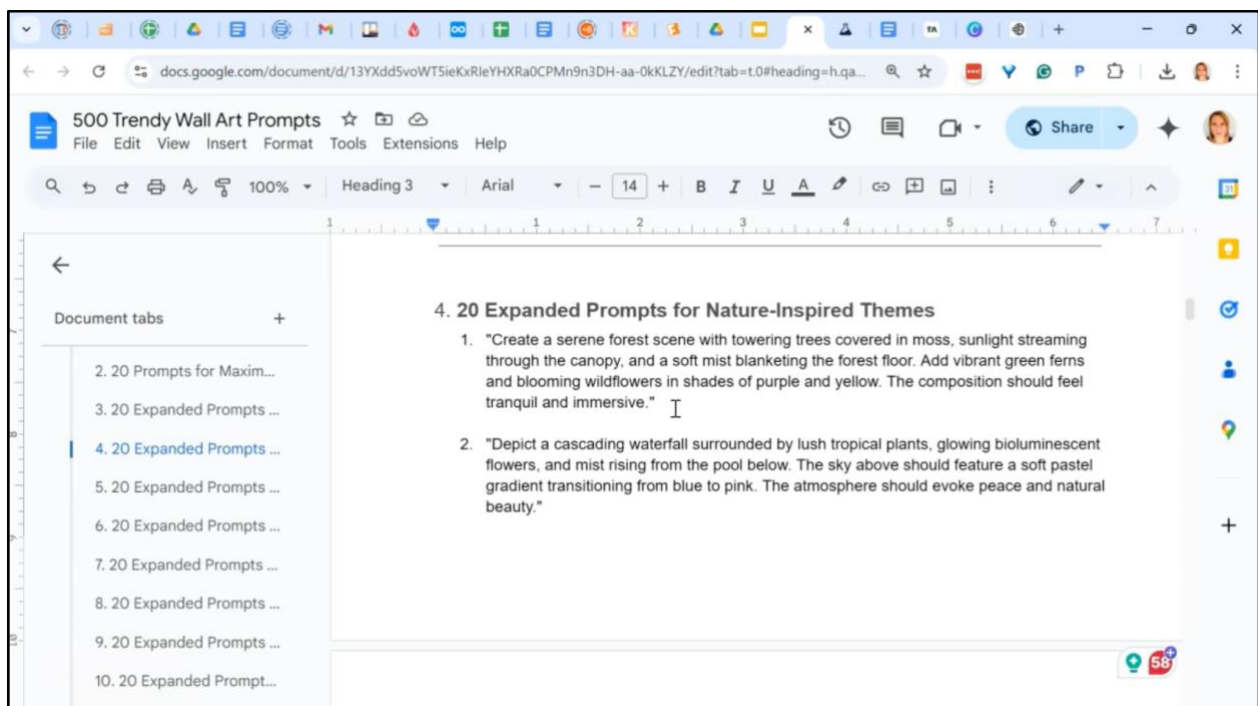

## Trending AI Wall Art: 500 Current Prompts and More

So we do have our prompts here, and of course this will probably look slightly different as you'll be getting this a little more formatted, but you can see here we have things like 20 prompts for modern surrealism, and all of these prompts will have a specific thing that's being designed for plus more information.

So we may have something about creating a specific atmosphere, like a mystical or an otherworldly feel, a serene effect, magical ambiance, and then we'll have the specific thing, like surreal meadow, underwater dreamscape, and then we'll have some more specifics. And that's a similar structure for these prompts for pretty much all of them.

So this one is nature inspired, forest scene, tranquil and immersive. So, what you can do with these is if you want to make variations you can take this to any AI tool and say, okay here is a sample prompt I want to make, you know, 50 more prompts for nature inspired themes with the, use this as a basic and then create variations.

Or if you have something more specific in mind you can do that. So this says create a serene forest scene with towering trees. So you could say something like create a serene forest scene with a tranquil lake and a meadow or something like that. So you can add in your own things to these and between you changing it up yourself, between asking the AI tool for variations, and then, of course, what you can do, as I mentioned a moment ago, is you can have it create one of these, and then you can ask it for some different variations as well, and in many cases, you can just get variations automatically.

So these are really fantastic because what you're going to be able to do is take things that are already popular wall art trends, and then you can create a lot of different variations for these.
